VOL. 4. No. 18.

AMERICAN FORK, UTAH, SATURDAY, August 25, 1906.

SUBSCRIPTION \$1.50

Meets Instant Death

Mrs. Emma McDonald of the McDonald hotel, received a severe shock, Tuesday morning when word reached her of the instant death of her husband, J. W. McDonald.

Mr. McDonald was a bridge builder in the employ of the Southern Pacific near Elko, Nevada, and was killed about two miles west of that place at an early hour Monday morning. Mr. McDonald was on a railroad velocipede at the time and is said to have been riding towards the train. Engineer Fitzgerald of the Overland whistled to notify him, but McDonald seemed to pay no attention to the signal and remained sitting on his machine, apparently asleep. The train was stopped too late, the body was badly mangled death being instantaneous.

Mrs. McDonald left here Tuesday noon, for Ogden, where the funeral was held.

Enos Kelley Dead.

Enos Kelley died at 11 o'clock Wednesday morning at the County Infirmary of tuberculosis of the bone, from which he has been a sufferer for many years. Deceased was 51 years old never having been married. He was the son of Wm. and Ann Kelley. The funeral service was held at the home of Thos. Kelley Thursday afternoon.

The irrigation committees of Lehi, Pleasant Grove and American Fork held a meeting in this city Wednesday evening, to discuss the advisability of completing the work on the Silver Lake reservoir in American Fork canyon, which had to be given up last fall owing to the approaching frost. A committee of two from each of the towns were appointed to go over the site today and report the condition and amount of work needed. T. J. Barratt and Alma Rowley went from this city.

Elbert Kelley's benefit party in the Apollo Tuesday night, netted him about \$135 and the Judge was happy on Thursday morning when he boarded a train for Minneapolis, where he is promised a pair of artificial legs that will enable him to walk. He will be gone about three weeks. Elbert wished the CITIZEN to express his appreciation to the good people of this city, who have helped him to undertake this expense.

Mrs. George Cunningham and Mrs. Mary Webb were called to Salt Lake Tuesday to be at the bedside of their daughter and sister, Mrs. Randolph Bergesen, who was taken with appendicitis, Monday morning. Mrs. Cunningham returned home Thursday and reported Mrs. Bergesen getting on nicely without an operation.

Miss Allie Miller and her brother Bert were hostess and host at a lawn party given at the home of C. B. Halliday, Thursday evening. About forty young people were present. The evening was spent in music, dancing and games; the amusing feature of which was a contest to see who could first eat an all day sucker in which all took part. John Firmage proved himself the heavy man and carried off first prize by eating a box of bon bons. Billie Barratt consoled himself with the booty, a nursing bottle. Delicate refreshments were served during the evening.

Alpine Items.

(By Special Correspondent)

Mrs. Hannah Bates is at Provo spending a few days with friends.

Darnald, the little son of James W. Vance is ill this week.

School will commence here on Sept. 3.

Sunday evening Mr. Edwin Smart of Provo spoke to a large audience concerning education. He was here in the interest of the B. Y. University in which institution he is a teacher.

The frequent heavy rain storms have caused considerable damage to crops. A great deal of hay was lying in the fields and it was almost spoiled. The flood water at once broke out of dry Creek and ran over some of the east fields partially covering the crops with mud. The citizens would appreciate water works.

Chamberlain's Colic, Cholera and Diarrhoea Remedy. Buy it now. It may save life.

Why Not Have It?

There is considerable favorable talk of bonding the city to enable it to complete a first class water works system. We now have the water in the main lines and at an expense of about \$18,000 the system could be completed giving all the residents sufficient water for culinary purposes. The expense so far incurred amounts to nearly \$5,000 and the estimate furnished by reliable engineers gives the figures of \$18,000 for a completion.

Some of our citizens are in favor of staying out of debt and continue to advance the system as the city is able with present incoming revenue, while the more favorable argument is for a completion at once and borrow the money on ten or fifteen year bonds, and from the regular revenue from those who use the water pay for the system.

The CITIZEN has not made a thorough study of the proposition, but the enthusiasm displayed by those who have and the success of less undertaking by other cities of less importance than American Fork leads us to believe it is the proper thing for this city to complete the system at once.

The water for this use is as pure as can be found in the State, is shown by analysis secured by water works committee of the city council.

American Fork is fast becoming a city of good homes and every week strangers are here to look up possibilities of purchasing lots in which to erect a residence. What we need to further beautify and enhance the value of this city as a desirable home town is a good water system. Why not have it?

High Wages

The following figures should be an incentive to any young man to work for an education.

The average educated man gets \$1,000 a year. He works forty years, making a total of \$40,000 in a lifetime. The average day laborer gets \$1.50 per day, 300 days in the year, or \$450 per year. In ten years he earns \$4,500, or \$18,000 in a lifetime. The difference between \$40,000 and \$18,000, or \$22,000, equals the value of an education in dollars. To acquire this capacity requires twelve years of school, 180 days each, or a total of 2,160 days. Divide \$22,000, value of an education, by 2,160, number of days required in getting it, and we find that each day at school is worth a little more than \$10 to a pupil.

Government reports indicate a continuance of the prosperity which the country has experienced for several years. The grain crop of 1906 contains the farmers. The total wheat crop is estimated at 760,000,000 bushels, an increase of 10 per cent over last year. The corn crop is estimated at 2,650,000,000 bushels. Other grains except oats, show an increase. This means that the farmer will have more money to spend, and all lines of trade will share in the benefit of the abundant harvests.

The rural mail routes were established for the benefit of rural homes or in other words the farmer. They have proven a greater benefit and blessing to the farmers than was anticipated by the most sanguine. A farmer, who has once enjoyed the advantages of the rural mail service would hardly know how to get along without it. It did not come to the farmer, however, until he had many times earned it. The farmers are our heaviest taxpayers. What property they have is in plain sight and is taxed, while the city man, at least many of them, who deals in notes and bonds is enabled to hide his wealth from the assessors. For a quarter of a century the mail has been carried to the city home, not once, but many times a day. Finally the big heart of Uncle Sam has reached out to the men who feed the world.

He was a thin fragile young preacher, but not half so helpless as he looked. He could see and hear what was going on, even during the last prayer. Just before closing service he said calmly but with great deal of impressiveness, to the square inch: "Those in the congregation who did not get all their things on during the prayer can do so while I pronounce the benediction." During which, however, the audience could hear each other's watches tick.

Things to Talk About

Theodore Roosevelt is going to Panama, and if the canal dirt doesn't fly some of the bosses will.

The greater part of the Kansas wheat crop will be stored by the farmers, this year in anticipation of a better price.

Germany is starting in for an international exposition in 1913 that shall surpass the Chicago and St. Louis fairs. Well, the Germans need about six years for that job.

A Chicago preacher tells his flock: "Better be a has been than a never wasser." He would no doubt be pleased if every worshipper in his congregation was a right nower.

Rockefeller, according to a statement recently handed down by his physician, "hasn't had anything to do with the Standard Oil Company for years." What lucky man is getting the 35 per cent dividends?

Since the great earthquake only 3 persons have committed suicide in San Francisco, while previous to that the average was twelve a week. An earthquake apparently makes San Franciscans consider life worth living.

Four Connecticut girls surrounded a big black snake the other day and stabbed it to death with hatspins. Oh, that Mother Eve had been so courageous—and had possessed hatspins!

The Kansas board of health has determined to wage a war on tuberculosis and the first step will be to secure a nearly complete census as possible. Each of the 3,000 regular physicians in the state will be sent blanks and asked to report an accurate list of the cases in his practice.

Mr. Rockefeller says his fortune is less than one-third of a billion dollars. However much his fortune may be, he does not pay any tax for the support of the United States government than any ordinary citizen. In fact, the tariff and internal revenue taxation rather favors the owner of the highest quality of goods.

Daniel B. Wesson, the revolver manufacturer, has left a fortune estimated at \$30,000,000. This can may be regarded as the measure of the value which America attaches to the revolver, for it is in this country that the particular brand of pistol is most widely used.

The paramount object in the culture of the grape in most parts of the world has been the obtaining of wine. The extent of this will be surprising and hardly believed by those not acquainted with the statistics. Thus for instance, there are annually produced on the globe over 4,000,000,000 gallons of wine. Of this amount the United States produces only about 50,000,000 gallons.

150,000 models of patents that have been granted in the past seventy five years are to be disposed of by the patent office. A good number of these will be given to the various colleges in the country. Some historic associations render them valuable as relics, will be sent to the Smithsonian institution. A great many of these models are of patents taken out by women.

The postoffice department in Washington has issued an order that may be of interest to merchants and mail carriers. All matter that is mailable under the new postal law, up to four pounds in weight, must be passed in at the postoffice window to be weighed, and the stamps placed thereon at the rate of one cent for each ounce of merchandise. The carrier is forbidden to take to cents from the shipper for delivering the package not stamped. The carrier who disobeys this ruling is liable to prosecution and possibly dismissal. See postoffice Guide for July 1906.

Notice of Dissolution.

TO WHOM IT MAY CONCERN—This is to notify all who have heretofore done business with the undersigned for the operation of the certain mill in American Fork, Utah, and all partnership relations between the undersigned John Crooks has purchased all of the interest of the undersigned George G. Robinson and will assume and pay all of the liabilities of the said partnership and will hereafter conduct the business in his behalf. Dated this 15th day of August, A. D. 1906.

JOHN CROOKS
GEORGE ROBINSON

Patronize Home Industry

We don't make this request from a charity stand point, but because we are here to build up a business in this city and without patronage we would certainly fail.
